To whom it may concern

Re: Infomentat Inc./Networkologist

We contracted *Infomentat Inc./Networkologist* in the summer of 2011 to assess the quality of the implantation of our new Public Web Site. They produce an exhaustive assessment report which was useful for our organisation.

Their application assessment was based on SharePoint 2010 and the report covered:

- a) reviewed the current design and construction of the Public Web Site;
- b) documented the impacts on our ability to support future development on the site;
- c) recommended modifications that would improve maintenance.

Their work has been very helpful and the result of their analysis will help us to move forward with this project.

We can confidently recommend *Infomentat Inc./Networkologist* as a solid and reliable consulting firm, and experts in their field.

Yours Sincerely,

Dominique Rivard
Director, Information Management and Technology Division
